TimeTable Architect

Designed by Shreya Prasad and Vineeth Rao under the guidance of Prof. Vanishree K

Crafted to Solve the most complicated problem of any college.

Making TimeTables

Automating
The process

The tedious task that takes months to put together,
now just a few clicks away!

A c++ project.

Using algorithms coded in c++ and WinForms plugin to take inputs from the user, the application returns output in the form of CSV's that the user can read and process.
